

ROONEY ANGUS ★ GREEN MOUNTAIN ANGUS

MONDAY, NOVEMBER 9, 2026

1 PM MT at Pays, Billings, Montana

Social and Preview Dinner

Sunday, Nov. 8 at 5 PM, at the Meadowlark Brewery in Billings, MT

SELLING 240 BULLS & 200 COMMERCIAL HEIFERS

100 Two Year Olds • 60 Falls • 80 Yearlings

Your New Source For High Altitude Bulls

TWO LEGACIES. ONE STANDARD

GREEN MOUNTAIN ANGUS

ROONEY ANGUS

TWO LEGACIES. ONE STANDARD

Hello Friends!

Rooney Angus and Green Mountain Angus are glad to welcome you to our Fall Production Sale on November 9, 2026. Whether you're a longtime friend or joining us for the first time, we're grateful you're here.

We are continually inspired by the resilience of the people in this industry. Year after year, you've faced whatever Mother Nature has thrown your way, and this year it was drought and the feed shortage that followed. You've adapted to change, found new ways to make your operations work, and moved forward with resolve. That spirit is what keeps agriculture strong, and it's what keeps us motivated to raise cattle worthy of your trust.

OUR OFFERING

This year we are pleased to offer 100 two-year-old bulls, 60 fall bulls, and 80 yearling bulls, along with 200 commercial bred heifers grouped by calving dates. We have made high-elevation performance a priority in our program. For the past two years, we have PAP tested both our bulls and heifers, and our scores reflect that commitment. We believe these bulls are well suited to go to work for you at high elevation. Alongside that focus, you'll find strong sire groups throughout the offering. Sons of Congress and Rise Above bring outstanding eye appeal and growth, paired with excellent carcass qualities, while sons of Authority and Commerce shine in calving ease with plenty of growth, rib shape, and eye appeal.

OUR COMMITMENT MOVING FORWARD

We are committed to carrying forward the legacies and values of the Green Mountain Angus and Rooney Angus families. Your successes, your challenges, and your feedback continue to guide our selection decisions and our dedication to quality. We are intentional in every decision we make, and we seek guidance from trusted experts in breeding, genetic testing, animal health, and nutrition so these cattle are developed with purpose. As we move forward, ours is a story of optimism and steady progress, written alongside yours. Every animal in this offering reflects our commitment to building a better future for your herd and ours.

YOU'RE INVITED

Please join us for a Social and Preview Dinner at the Meadowlark Brewery in Billings, Montana, on Sunday, November 8. The social begins at 5:00 p.m., followed at 6:00 p.m. by our special guest speaker, Turk Stovall of the Montana Stockgrowers Association and Yellowstone Cattle Feeders, with dinner and drinks to follow. We look forward to visiting with you!

JOIN US ON SALE DAY

We hope you'll join us the following day, Monday, November 9, for our Fall Production Sale at PAYS in Billings. Bulls will arrive Saturday, November 7, and will be available for viewing throughout the weekend. Lunch will be served at 11:00 a.m., and the sale begins at 1:00 p.m. Whether you're in the seats, on the phone, or bidding online, we're grateful for your interest and look forward to seeing you there.

*Steve & Karen Rooney Family
and Tim & Kris Todd Family*

ANNUAL PRODUCTION BULL SALE

MONDAY, NOVEMBER 9, 2026

1:00 PM MT // PAYS, BILLINGS, MONTANA

**SELLING 240 BULLS &
200 COMMERCIAL BRED HEIFERS**

100 Two Year Olds • 60 Falls • 80 Yearlings

Sale will be broadcasted on

(866) 313-0123

AUCTIONEER: Roger Jacobs

REPRESENTATIVES:

Kurt Kangas.....American Angus Assn & Angus Journal
John Goggins.....Western Ag Reporter
Kevin Murnin.....Western Livestock Journal
Jaramie McLean.....Tri-State Livestock News
Andy Rest.....The Cattle Business Weekly
Jeff Thomas.....Agri-Media Livestock
Curt Cox.....Western Livestock Roundup

DELIVERY

Free delivery on all bulls. We will try to deliver cattle to your ranch. In cases of inclement weather conditions, we would request that you meet us at a suitable place for both parties. Please leave your complete mailing address, phone number and directions to you ranch.

INSPECTION OF CATTLE

Cattle will be available for viewing on Saturday, Nov. 7th at the Public Auction Yards.

HEALTH

Pyramid 5 -Vision 8 Somnus & Nuplura at branding and weaning & Nasalgen & Multimin. Bulls will have 2 rounds of Fusogard before spring delivery.

LIVESTOCK MORTALITY INSURANCE

Mortality insurance will be available for your purchases at the sale

BUYERS THAT ARE UNABLE TO ATTEND SALE

Buyers may send their bids to the field representatives or Auctioneer. Bids will be handled as if you were present.

GREEN MOUNTAIN ANGUS & ROONEY ANGUS RETAINS ONE
THIRD REVENUE SHARING INTERESTS IN EACH BULL SELLING.
BUYER HAS 100% POSSESSION AND 100% SALVAGE VALUE.

*FREE DELIVERY ON ALL BULLS &
FREE WINTERING ON ALL BULLS*

SALE DAY PHONE:

SALE HEADQUARTERS

Public Auction Yards
1802 Minnesota Ave
Billings, MT 59101

LUNCH

A complimentary lunch will
be served at PAYS.

LOT NUMBERS

Lot numbers will correspond with the lot number in the catalog.
Low birth weight bulls will have white ear tags and cow bulls will have green tags.

THE GUARANTEE

All bulls will be covered 50% by Green Mountain Angus & Rooney Angus if they are injured during their first breeding season and unable to return to service during that first breeding season. Breeding season is defined as the 90-day period following the first turnout of the bulls. If a replacement bull is available, he will be provided, or if a buyer prefers credit towards a bull in the following year's sale, 50% of the value of the injured bull, minus one-half salvage value will be given as credit. All injured bulls must be diagnosed by a veterinarian. Please notify us as soon as possible should injury occur and prior to the injured bull being sold for salvage. All claims must be made by September 1st, 2027.

TERMS & CONDITIONS

This sale is being conducted under the suggested terms and conditions adopted by the American Angus Association effective March 16, 1992. Except for those stated in the terms and conditions, there are no warranties, either expressed or implied, as to merchantability or fitness for particular purpose with respect to the cattle being sold in this auction. The warranties and guarantees set forth in the "Terms and Conditions are in Lieu of all warranties, either expressed or implied and remedies provided there in shall be the sole and exclusive remedy of the buyer (or any party claiming through buyer) for all other obligations or liabilities. A copy of the Association Terms and Conditions will be available sale day for inspection.

Videos will be online at RooneyAngus.com – Also check out our facebook page

Management EPDs

Carcass EPDs

Expected Progeny Difference (EPD), is the prediction of how future progeny of each animal are expected to perform relative to the progeny of other animals listed in the database. EPDs are expressed in units of measure for the trait, plus or minus. Interim EPDs may appear on young animals when their performance has yet to be incorporated into the American Angus Association National Cattle Evaluation (NCE) procedures. This EPD will be preceded by an "I", and may or may not include the animal's own performance record for a particular trait, depending on its availability, appropriate contemporary grouping, or data edits needed for NCE.

PRODUCTION EPDs

Calving Ease Direct (CED), is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.

Birth Weight EPD (BW), expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

Weaning Weight EPD (WW), expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires.

Yearling Weight EPD (YW), expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires.

Scrotal Circumference EPD (SC), expressed in centimeters, is a predictor of the difference in transmitting ability for scrotal size compared to that of other sires.

MANAGEMENT EPDs

Docility (Doc), is expressed as a difference in yearling cattle temperament, with a higher value indicating more favorable docility. It predicts the average difference of progeny from a sire in comparison with another sire's calves. In herds where temperament problems are not an issue, this expected difference would not be realized.

Claw Set EPD (Claw), is expressed in units of claw-set score, with a lower EPD being more favorable indicating a sire will produce progeny with more ideal claw set. The ideal claw set is toes that are symmetrical, even and appropriately spaced.

Foot Angle EPD (Angle), is expressed in units of foot-angle score, with a lower EPD being more favorable indicating a sire will produce progeny with more ideal foot angle. The ideal is a 45-degree angle at the pastern joint with appropriate toe length and heel depth.

Pulmonary arterial pressure EPD (PAP), is expressed in millimeters of Mercury (mmHg), with a lower EPD being more favorable indicating a sire should produce progeny with a lower PAP score. PAP score is an indicator of susceptibility to high altitude disease commonly experienced at elevations greater than 5,500 feet. Selection for this trait aims to improve the genetic potential for a sire's progeny to have lower PAP scores thus a lower chance of contracting high altitude disease increasing the environmental adaptability of cattle living in mountain areas.

MATERNAL EPDs

Heifer Pregnancy (HP), is a selection tool to increase the probability or chance of a sire's daughters becoming pregnant as first-calf heifers during a normal breeding season. A higher EPD is the more favorable direction and the EPD is reported in percentage units.

Maternal Milk EPD (Milk), is a predictor of a sire's genetic merit for milk and mothering ability as expressed in his daughters compared to daughters of other sires. In other words, it is that part of a calf's weaning weight attributed to milk and mothering ability.

Teat Size EPD (Teat), expressed in units of teat size score, with a higher EPD indicating a sire will produce daughters with smaller teat size compared to that of other sires' daughters.

MATERNAL EPDs

Udder Suspension EPD (UDDR), expressed in units of udder suspension score, with a higher EPD indicating a sire will produce daughters with tighter udder suspension compared to that of other sires' daughters.

Functional Longevity EPD (FL), expressed in number of calves, is a predictor of the number of calves a sire's daughters are predicted to produce by 6 years of age compared to that of other sires' daughters. A higher EPD is the more favorable direction indicating more calves produced on average.

Cow Energy Value (\$EN), expressed in dollar savings per cow per year, assesses differences in cow energy requirements as an expected dollar savings difference in daughters of sires. A larger value is more favorable when comparing two animals (more dollars saved on feed energy expenses). Components for computing the cow \$EN savings difference include lactation energy requirements and energy costs associated with differences in mature cow size.

CARCASS EPDs

Carcass Weight EPD (CW), expressed in pounds is a predictor of the differences in hot carcass weight of a sire's progeny compared to progeny of other sires.

Marbling EPD (Marb), expressed as a fraction of the difference in USDA marbling score of a sire's progeny compared to progeny of other sires.

Ribeye Area EPD (RE), expressed in square inches, is a predictor of the difference in ribeye area of a sire's progeny compared to progeny of other sires.

Fat Thickness EPD (Fat), expressed in inches, is a predictor of the differences in external fat thickness at the 12th rib (as measured between the 12th and 13th ribs) of a sire's progeny compared to progeny of other sires. Group/progeny (C Grp/ Pg and U Grp/Pg) reflects the number of contemporary groups and the number of carcass and ultrasound progeny included in the analysis.

\$VALUE INDEXES

\$Value indexes, an economic selection index allows multiple change in several different traits at once pertaining to a specific breeding objective. The \$Value is an estimate of how future progeny of each sire are expected to perform, on average, compared to progeny of other sires if the sires were randomly mated to cows and if calves were exposed to the same environment.

Maternal Weaned Calf Value (\$M), an index, expressed in dollars per head, predicts profitability differences from conception to weaning with the underlying breeding objective assuming that individuals retain their own replacement females within herd and sell the rest of the cull female and all male progeny as feeder calves. The model assumes commercial producers will replace 25% of their breeding females in the first generation and 20% of their breeding females in each subsequent generation. Traits included are as follows: calving ease direct, calving ease maternal, weaning weight, milk, heifer pregnancy, docility, mature cow weight, claw set and foot angle. **Weaned Calf Value (\$W)**, an index, expressed in dollars per head, to predict profitability differences in progeny due to genetics from birth to weaning. The underlying objective being producers will retain 20% of the female progeny as replacements and sell the rest of the cull females and their male counterparts as feeder calves. Traits included are as follows (in no particular order): birth weight, weaning weight, milk, and mature cow weight.

Beef Value (\$B), a terminal index, expressed in dollars per carcass, to predict profitability differences in progeny due to genetics for postweaning and carcass traits. This terminal index assumes commercial producers wean all male and female progeny, retain ownership of these animals through the feedlot phase and market these animals on a carcass grid. Traits included in the index are as follows: yearling weight, dry-matter intake, marbling, carcass weight, ribeye area and fat.

Combined Value (\$C), an index, expressed in dollars per head, which includes all traits that make up both Maternal Weaned Calf Value (\$M) and Beef Value (\$B) with the objective that commercial producers will replace 20% of their breeding females per year with replacement heifers retained within their own herd. The remaining cull heifer and steer progeny are then assumed to be sent to the feedlot where the producers retain ownership of those cattle and sell them on a quality-based carcass merit grid. Expected progeny differences (EPDs) directly influencing a combined index: calving ease direct (CED) and maternal (CEM), weaning weight (WW), yearling weight (YW), maternal milk (Milk), heifer pregnancy (HP), docility (DOC), mature cow weight (MW), foot angle (Angle), claw set (Claw), dry matter intake (DMI), marbling (Marb), carcass weight (CW), ribeye area (RE) and fat thickness (Fat).

This attractive, soft made, moderate birth bull follows the path of all the Congress sons. They have an ultra cool look, and are very sound with outstanding PAP. P670 has excellent BW to YW spread, very good HP, excellent CEM, controlled mature height, very good fluid longevity, nice foot scores, tremendous \$M and \$C.

This lead off son by Armstrong, the extremely popular young sire, that has all the incredible attributes that you would expect from his legendary sire. The combination of Armstrong and Flagstone have really proven to be a great combination over the last couple of sales. P374 has very good YW, excellent HP, top 20% CEM, very good teat and udder scores, top 2% angle, top 20% RE with outstanding \$M.

The Authority cattle are some of the easiest fleshing, most attractive cattle I have seen in the country. He is the son of the \$265,000 Heisman tracing back to the great Whitney family. When you combine the great 680 with the sire like Authority it is truly magical. Lot 17 has an excellent BW and YW combination, nice scrotal and HP, very good milk, outstanding fluid longevity, top 10% CW, top 10% RE, top 15% MARB with big-time dollar values.

Now here is something very interesting a young son by Boyd salute, tracing back to an outstanding GAR Dual Threat daughter, that brings all the end product you'll ever need to the table. P361 has outstanding top 10% YW, very good HP, nice CEM, controlled mature height, very good foot scores, top 10% CW with outstanding dollar values.

Take a look at this outstanding double digit CED sire with absolutely top of the breed growth, this is a very hard combination to acquire, pounds with very light calves that's what we're all after. P364 has a double digit CED with a very good BW, top 2% WW & YW, excellent scrotal and HP combination, very good fluid longevity, top 2% CW with balanced dollar values.

This young sire would be a lead off bull for any sale in the country, his set of genomics is so outstanding. It's hard to duplicate. This young sire has all the maternal traits a man could ever desire to go along with outstanding end product. P258 has a double digit CED with a negative BW, outstanding top 10% YW, very good scrotal an HP combination, top 10% CEM, top 5% fluid longevity, very controlled mature height, top 10% foot scores, top 4% PAP, top 10% CW, top 5% RE, top 1% \$M with top 5% \$C.

Another young Congress son that has top end growth, with a ton of end product. The Congress sons are well known for their outstanding phenotype and genotype combination. P729 has top 2% WW and top 4% YW, very good HPeExcellent teat and udder scores, controlled mature height, top 3% PAP, top 15% CW, with very balanced dollar values.

Driving the science of better breeding

There's little room for error in the cattle business. You need the most advanced information to make smart selection decisions, and Angus Genetics Inc. (AGI®) provides it through genomically-enhanced expected progeny differences (GE-EPDs). GE-EPDs have become the industry standard for herd improvement, building on decades of science-backed genetic evaluation tools originated and maintained through the American Angus Association®, home to the largest and ever-growing single-breed beef cattle database.

EPDs that traditionally contained all pedigree, performance and progeny information now also include results from available genomic, or DNA, tests. Breeders who use genomic technology give buyers access to AGI-generated GE-EPDs that provide:

Increased predictability and decreased risk for young and unproven animals due to enhanced accuracy of EPDs

Better characterization of genetics for difficult-to-measure performance traits (such as carcass traits, maternal traits and feed efficiency)

The ability to make more rapid progress for traits that are important to you, due to:

- more accurate selection
- easier identification of genetic outliers
- the ability to propagate young animals with confidence earlier in their lives

In fact, GE-EPDs on unproven animals have the same level of accuracy as if they had recorded 9-33 calves, depending on the trait. That's valuable insight, offered regularly through the breed's weekly national cattle evaluation.

Trait	Progeny Equivalent	Trait	Progeny Equivalent
Calving Ease Direct	24	Heifer Pregnancy	28
Calving Ease Maternal	18	Maternal Milk	33
Birth Weight	22	Mature Weight	14
Weaning Weight	25	Mature Height	9
Yearling Weight	20	Carcass Weight	13
Yearling Height	15	Marbling Score	10
Dry Matter Intake	12	Ribeye Area	11
Scrotal Circumference	12	Backfat Thickness	11
Docility	10	Teat Size	12
Foot Claw Set	13	Udder Suspension	13
Foot Angle	12	Pulmonary Arterial Pressure	7
		Hair Shed Score	10

How do you know if EPDs are genomically-enhanced?

Ask your breeder, refer to the registration paper, or look for the AGI GE-EPD logo, Angus GS™ powered by partner Neogen GeneSeek or the HD50K by partner Zoetis. These images indicate animals for which low-density or high-density genomic testing has been conducted and incorporated by AGI into GE-EPDs.

Here is our first Commerce son to sell today. Commerce appears to be a great balanced sire, his genomics and his phenotype are very balanced, with cattle that are very structurally sound. N1134 has a double digit CED with a top 3%YW, very good scrotal and HP combination, top 2% CEM, controlled mature height, negative PAP, top 10% CW, top 3% \$M and outstanding dollar values.

Another great calving ease sire by the great \$600,000 Jamison. This young sire excels for growth, while still having a double digit CED, two traits that are very hard to combine. N1121 has a double digit CED with a top 2% WW and YW, very good scrotal an HP combination, nice milk, controlled mature height, top 10% angle, excellent docility, top 2% CW, top 15% RE with big-time dollar values.

Another great Congress son with extra growth and power, he should come as no surprise as his dam is a direct daughter of Tex Playbook, the bowl that is known for functional powerful cattle. N1205 has top 15% WW and YW very good scrotal an HP combination, nice CEM, very good angle, top 10% docility, top 20% CW, top 4% \$M with outstanding dollar values.

Powerfully made Congress son, that has all the growth and look that Congress has become famous for. Congress is the only Triple Crown winner in the National PGS show history. 029N has very good YW and WW, very good scrotal an HP combination, top 10% milk, very good fluid longevity, controlled mature height, top 10% foot scores, top 1% PAP, top 5% CW with balanced dollar values.

This age advantage bull is absolutely one of the top sleep all night heifer sires of the entire offering. If you look on the bottom of the pedigree, the dam is a 1682 female, so you know you're getting all the power in depth you could ever ask for. 070N has top 1% CED with a negative BW, outstanding scrotal an HP combination, very good CEM, controlled mature height, top 10% fluid longevity, great foot scores, negative PAP with balanced dollar values.

Take a look at this Congress son that is heavily muscled, big middled, flat topped, big ribbed and travels very wide. The Congress cattle have been sensational across the country for the past four years. 031N has very good YW, excellent scrotal an HP combination, controlled mature height, excellent fluid longevity, top 5% angle, negative PAP, top 10% CW with big-time dollar values.

We finally get to our first Great Lakes son, and look who he traces back to, the legendary 680, the absolute top donor in the program for the past five years. The Great Lakes cattle have been very well received as they have top sales across the country. N012 has very good growth, excellent scrotal an HP combination, nice milk, controlled mature height, nice fluid longevity, outstanding foot scores, negative PAP, top 15% CW, top 4% \$M with great dollar values.

We finally get to our first Jordan son that is deep, long, square hipped with a great big rib. The Jordan cattle are famously from the Isabel cow family, one of the top maternal females the breed has ever known. N918 has top 4% WW & YW, very good HP, top 20% CEM, very controlled mature height, nice angle, top 10% CW, top 4% RE with big-time dollar values.

Another one of these Relentless sons that has that extra age, and is ready and willing to go to work immediately. The bottom side of this pedigree is built for maternal traits, as you see Stellar and Logo directly in the pedigree. N925 has top 5% YW, excellent HP and scrotal combination, very good milk, excellent fluid longevity, top 3% claw, top 1% PAP, top 10% \$M and very good dollar values.

Here is another Patriarch son that traces back to an Architect dam so you know you will get all the calving ease and power you could ever ask for in a moderate and powerful package. N217 has a double digit CED with a negative BW, very good scrotal and HP combination, top 3% CEM, controlled mature right, nice fluid longevity, great foot scores, excellent docility, top 20% CW with big-time dollar values.

Another outstanding age advantage Congress son, that traces back to a Flagstone daughter in the prime of her life. Flagstone has been the top sire group in the program for the past four seasons. N161 has a very good birth to growth spread, nice HP, top 10% teat and udder scores, top 10% fluid longevity, top 1% foot scores, top 3% PAP with excellent dollar value.

Talk about a unique pedigree, take a look at the bottom side of this pedigree, you definitely don't have cattle related to this one. Authority has been one of the top young sires in the industry, his fleshing ability is second to none. N522 has very good growth, nice scrotal and HP combination, very good fluid longevity, controlled mature height and weight, nice foot scores to go along with great dollar values.

FRONTIER LIVE SALE

This Sale will be broadcast live on www.frontierlivesale.com. To view a sale,

1. Create an account, if you have already done so skip to next step. To create a new account, click on the word **Registration** in the upper right hand corner. You must fill out the information requested. Then click **Create Account**. An email will be sent to your email account you provided. Please click the link in the email to activate your new account.

2. Once you click the link, your account will now be activated

3. At this point, you may click **Continue To Browse Our Site**. This will allow you to view all upcoming auctions.

4. Once you see the auction you are interested in, click **Get Approved To Bid** for absentee and live bidding.

5. Please enter your information in the form. Depending on the auctioneer, different information may be requested. Click **I agree to sale terms and conditions**. Congratulations! You are now approved for the auction. Now that you're approved you can participate in the auction and bid on its items.

6. Login on sale day with the credentials provided at registration.

Call 866-313-0123 for tech help.

Now here is a true western bull, he is heavily muscled, big middled, with a huge rib that ties into an outstanding back %. N330 has a double digit CED with a great BW, very good scrotal an HP combination, nice CEM, very good teat and udder scores, excellent angle, very good docility with nice dollar values.

Lot 187: Here's a Jordan son that really packs a punch what it comes to end product merit, he is one of the top sons of the day when it comes to all carcass traits combined. N944 has a double digit CED with excellent YW, nice HP, very good CEM, outstanding fluid longevity, negative PAP with huge dollar values.

Here is another age advantage sire by Conclusion, that has absolutely a near perfect set a EPD's from a very moderate birth to outstanding YW, while still having very good carcass and dollar values. N842 has a double digit CED with top 1% WW and YW, very good scrotal, nice milk, excellent fluid longevity, controlled mature height, top 10% docility, negative PAP with excellent dollar values.

If your desire is to add extra power to your cow herd this incredible Salvation son will do just that. Salvation is widely known as the most moderate power bull of the last 10 years. N936 has excellent YW, very good scrotal and HP combination, nice fluid longevity, controlled mature height, top 1% foot scores, negative PAP with great dollar values.

Here is a wide topped, heavy muscled, great traveling powerhouse of a sire. This Boyd Bluegrass son back to a Wildcat female, has really packed a punch when it comes to phenotype and genotype combination. N836 has a top 10% YW, excellent CEM, controlled mature height, excellent foot scores, top 15% MARB with balanced dollar Values.

Check out this long spined Ambitious son that traces back to the great Blackbird cow family. These Ambitious cattle have really been topping sales around the country, people seem to love their long spine with added frame. N960 has a double digit CED with great YW, excellent HP, outstanding teat and udder scores, perfect PAP, excellent MARB with balanced dollar values.

Very interesting pedigree here, with Man In Black and Hometown being in the same pedigree and then tracing all the way back to VAR Power-Play. This truly will be an outstanding sleep all night heifer sire. N778 has a double digit CED with a negative BW, top 1% YW, top 4% scrotal, top 20% HP, top 3% CEM, excellent docility, negative PAP with big-time dollar values.

Another one of the top genomics sons of the entire day. This may be the top sleep all night heifer bull of the entire offering, he has an amazing top 1% CED and top 1% BW while still being in the top 20% for growth, this is truly very hard feat to achieve. N770 has a double digit CED with a negative BW, excellent scrotal and HP combination, top 1% CEM, top 10% fluid longevity, very good foot scores, top 10% MARB with amazing dollar values.

Here is another one of those program animals, S Armstrong combining with Flagstone and then tracing all the way back to the legendary Active Duty, you can't go wrong with the sire bred like this. N307 has a negative BW, very good scrotal an HP combination, top 10% milk, outstanding teat and udder scores, top 3% fluid longevity, top 4% angle, top 10% RE with big-time dollar values.

Commercial Bred Heifers

200 Bred Heifers

Synchronized and AI'd to MRA Advocate 9035 & Linz Congress 2019

Ultrasounded for calving dates

This year's sale heifers look to be the best set we have ever offered. These heifers have come out of our South Dakota commercial herd with Green Mountain genetics. These heifers will have a very selective sort on them and will be good enough to go into any herd. The AI'd heifers are bred to 2 of the top calving ease bulls in the breed Linz Congress 2019 & MRA Advocate 9035 and the others are cleaned up with top calving ease Green Mountain bulls. These heifers will be sold in tight calving groups ranging from the 3rd week of February, a large group of March calvers, a group of April calvers and a group of May calvers. This will be a great opportunity to purchase some of our top genetics. These heifers will make a great set of cows and have a lot of future in front of them. The heifers are at Brad Kraft's feedlot in Billings if you want to have a look at them.

Group A

Green tags Lots 1 thru 16

Lots 1 thru 16 are synchronized &
AI bred to Linz Congress
Due 2/21/2027 to 2/26/2027

Group B

Red tags 1 thru 48

Lots 1 thru 48 are synchronized
& AI bred to MRA Advocate
Due 3/1/2027

Group C

White tags 1 thru 41

Bred to low-birth-weight
GMAR bulls
Due 3/10/2027 thru 3/30/2027

Group D

Blue tags 1 thru 15

Bred to low-birth-weight
GMAR bulls
Due April 2027

Group E

Yellow tags 1 thru 5

Bred to low-birth-weight
GMAR bulls
Due 5/10/2027

Group F

American Angus Association \$Value Indexes

Dollar value indexes, or **\$Values**, are a tool used to select for several traits at once based on a specific breeding objective. An economic index approach takes into account genetic and economic values as well as the relationships between traits to select for profit.

ANGUS
THE BUSINESS BREED

Maternal Weaned Calf Value (\$M), an index expressed in dollars per head, predicts profitability differences in progeny due to genetics from conception to weaning. \$M is built off of a self-replacing herd model where commercial cattlemen replace 25% of their breeding females in the first generation and 20% in subsequent generations. Remaining cull females and all male progeny are sold as feeder calves. Increased selection pressure on \$M aims to decrease overall mature cow size and improve foot structure and fertility while maintaining weaning weights consistent with today's production.

Weaned Calf Value (\$W), an index expressed in dollars per head, provides the expected difference in future progeny preweaning performance from birth to weaning. \$W assumes that producers retain 20% of their female progeny for replacements and sell the rest of their cull female and male progeny as feeder calves. Over time, increased selection pressure on \$W will increase weaning and maternal milk traits while also continuing to increase mature cow size.

Feedlot Value (\$F), an index expressed in dollars per head, is the expected average difference in future progeny performance for post-weaning merit compared to progeny of other sires. The underlying objective assumes commercial producers will retain ownership of cattle through the feedlot phase and sell fed cattle on a carcass weight basis with no considerations of premiums or discounts for quality and yield grade.

Grid Value (\$G), an index expressed in dollars per carcass, is the expected average difference in future progeny performance for carcass grid merit, including quality and yield grade attributes, compared to progeny of other sires.

Beef Value (\$B), an index expressed in dollars per carcass, facilitates simultaneous multi-trait genetic selection for feedlot and carcass merit. \$B represents the expected average differences in the progeny postweaning performance and carcass value compared to progeny of other sires. This index assumes commercial producers wean all male and female progeny, retain ownership of these animals through the feedlot phase and market these animals on a quality-based carcass grid.

Combined Value (\$C), an index expressed in dollars per head, includes all traits that make up both \$M and \$B with the objective that commercial producers will replace 20% of their breeding females per year with replacement heifers retained within their own herd. The remaining cull heifer and steer progeny are then assumed to be sent to the feedlot where the producers retain ownership of those cattle and eventually sell them on a quality-based carcass merit grid.
